EDUCATION	Indian Institute of Technology , Kanpur, India Dual Degree BT-MT Student, Department of Electrical Engineering Minor Degree in Cognitive Sciences Supervisors: Dr. Gabriel Kreiman, Harvard Medical School and Prof. K. S. Venkatesh, IIT Kanpur <i>Master GPA: 10.0/10.0 Bachelor GPA: 8.8/10.0</i>	Jul '16 - Jul. '21
-----------	---	--------------------

- Founded Brain and Cognitive Society at IIT Kanpur (An interdisciplinary student society which aims to study brain science and reverse engineer human intelligence to create more general and intelligent Artificial Intelligence) [[BCS@IITK Homepage](#)]
- Fellowship awardee for the prestigious Khorana Program for Scholars 2019, IUSSTF (only 47 students were selected all over India to conduct research in the United States)
- Selected for a Summer Internship at SUTD Singapore in the second year (2018)
- Received Academic Excellence Award twice for outstanding academic performance (awarded to top 7% of students in the institute) for the year 2016 and 2016-17
- 99.89 percentile in Joint Entrance Examination (IIT-JEE 2016) among 1.5 million students
- Secured All India Rank 842 in KVPY 2015, a fellowship exam conducted by IISc Bangalore and funded by Department of Science and Technology, Govt. of India

- **Research Assistant**, Kreiman Lab, Harvard Medical School, Boston, USA May '19 - Ongoing
Computational Modelling of Human Vision and Visual Search
 - Developed an eccentricity dependent computational model of the visual cortex.
 - The developed model was used to build a computational model of visual search that could replicate the visual search performance of humans across various visual search tasks
 - Presently, preparing a draft of our work to publish in a reputed journal
- **Reinforcement Based Learning on Classification Task** May '20 - Ongoing
 - Developed a novel method to train deep learning models on an image classification task which yields better generalization and adversarial accuracy. Empirical evaluation was done on CIFAR 10 dataset
 - Tested the robustness of the trained model against FGSM, PGD, and AutoAttack adversarial attacks
- **Undergraduate Project**, Prof. Nisheeth Srivastava, IIT Kanpur, India Dec '18 - Apr '19
Introducing Spike-Timing-Dependent Plasticity in Multi-Layer Perceptron
 - Derived a local learning rule based on spike-timing-dependent plasticity (found in Biological Neurons) that uses the information about only neighbouring neurons to get weight updates in an ANNs
 - Empirical evaluation was done using IRIS & MNIST dataset on one vs all binary classification test
